

# Accelerating international cooperation on CETMs for advancing the global agenda on climate action

Meeting of the ESCWA Expert Group on Extractive Industries

21 May 2025

Kapil Narula, PhD  
Climate Champions Team

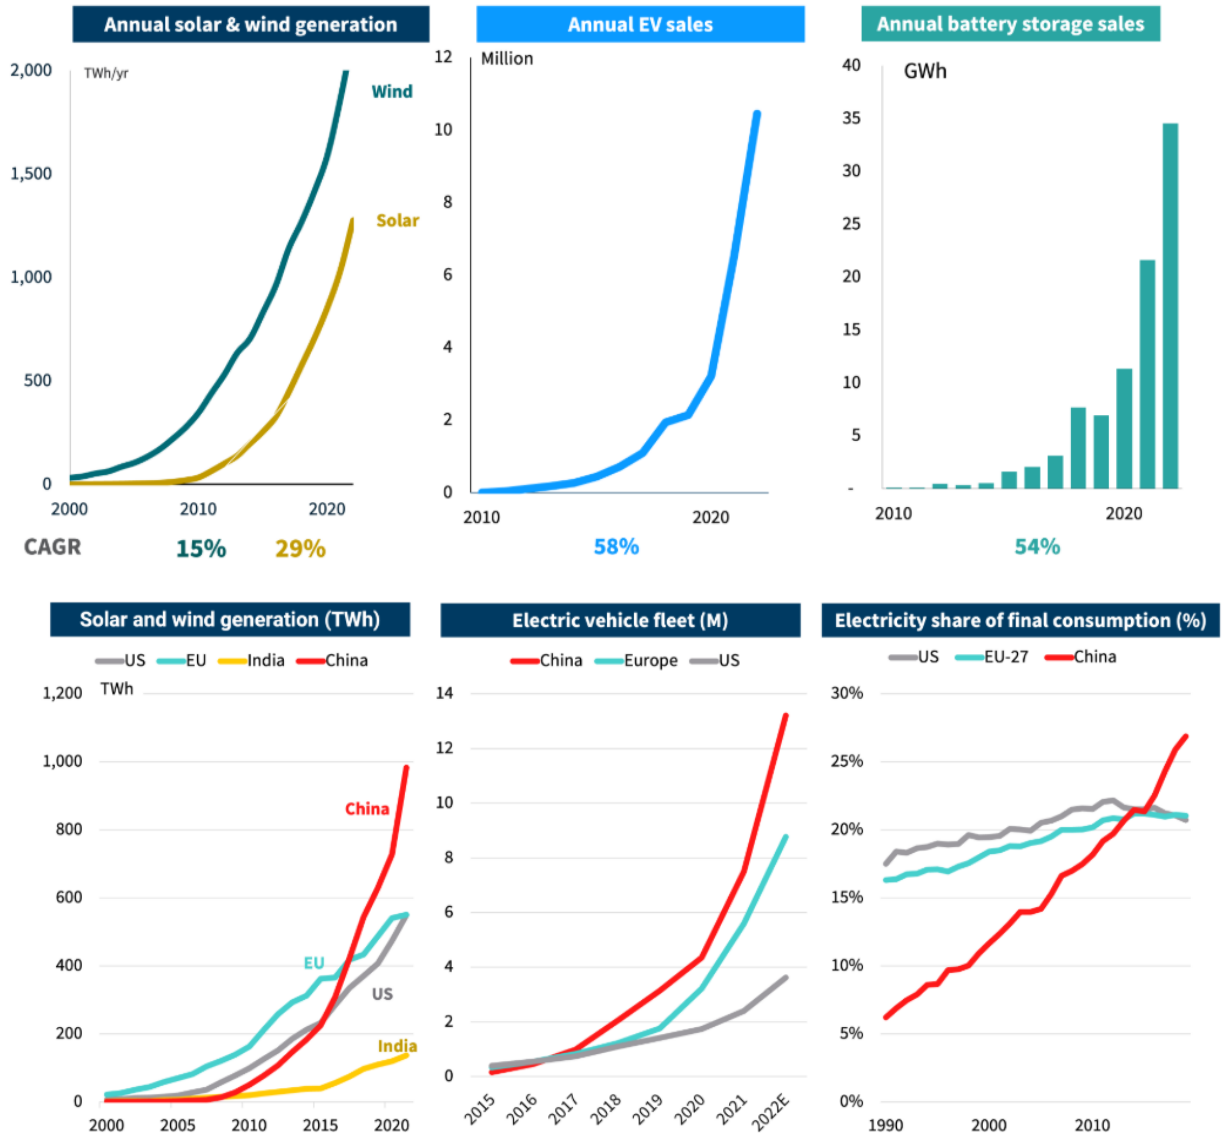

# Content

- Bright spots in adoption of clean energy technologies
- Concentration in clean technology supply chains
- Advancing international cooperation on CETMs
- Accelerating climate action - The Breakthrough Agenda
- Call to Action

# Adoption of clean energy technologies

- Deployment of few clean energy technologies is exponential
- Progress is uneven across sectors and geographies
- Across manufacturing, deployment, and costs, China leads the race

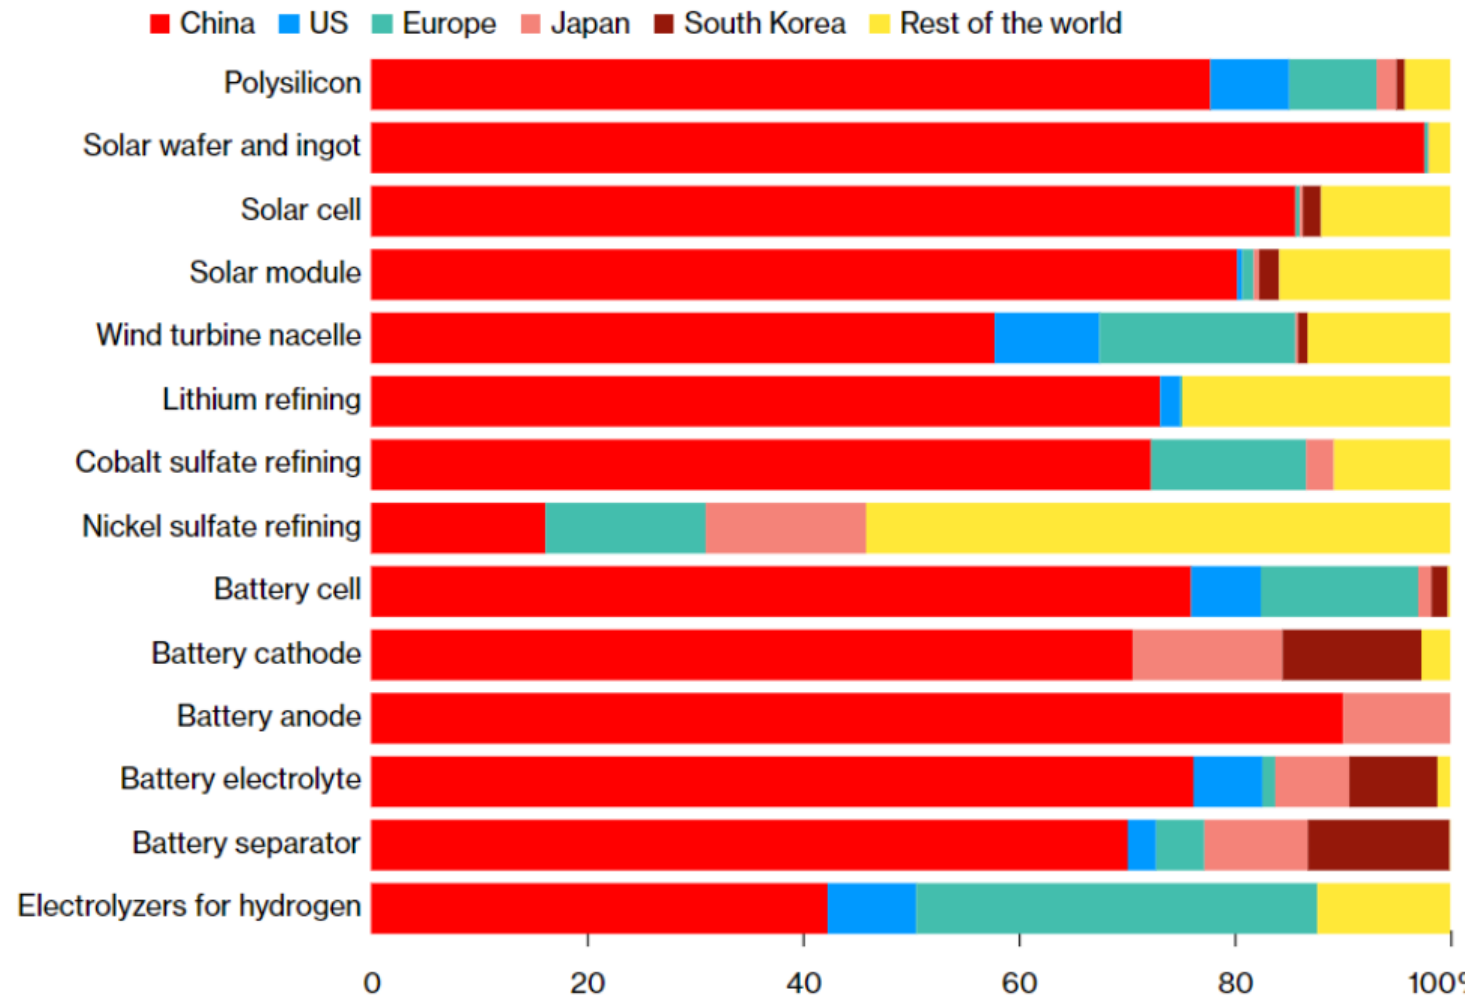

Source: RMI

# Clean technology supply chains

- Clean tech manufacturing is heavily concentrated in China
- Pros: Onshoring diversifies value chains, has political support, creates local value, security
- Cons: Expensive to replicate and localize lean & efficient global supply chains, increases overall cost for energy transition

Clean energy manufacturing capacity by location

# Advancing international cooperation

- Creating an **International Critical Minerals Observatory (ICMO)** supported by the UN regional economic commissions
- Adopting **data reporting framework** and resource management systems. Maintaining a **central database**, including stockpiles of various CETMs
- Integrating the CETMs agenda into **existing multilateral forums**, including in discussions on climate finance
- **Mobilising a global fund for CETMs** to address investment shortages and to fund activities for **just transition in mining**
- Ensure transparent supply chains by endorsing a **global mining standard**
- Promoting **economic diversification by fostering local value addition** and providing technical, financial, knowledge services through **establishing regional Centre of Excellence**

The role of minerals and raw materials in supporting the energy transition in the Arab region

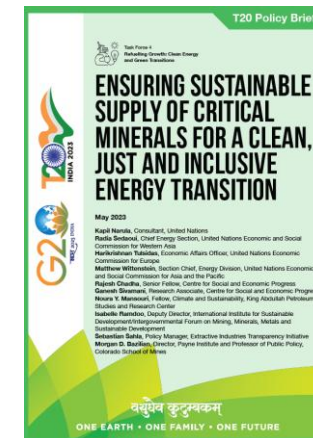

## Think7 G7 Policy Brief April 2023

### Critical Minerals for Net-Zero Transition: How the G7 can Address Supply Chain Challenges and Socioenvironmental Spillovers\*

Handbooker Jeyarajanan, Research Manager, Climate and Energy, and South Asia Regional Coordinator, Institute for Global Environmental Strategies (IGES), Japan  
 Masafumi Nakada, Research Manager and Deputy Director, Integrated Sustainability Centre, IGES, Japan  
 Simon Helling, Chief, Research Manager, Integrated Sustainability Centre, IGES, Japan  
 Tetsuya Morita, Policy Researcher, Climate and Energy, IGES, Japan  
 Satoshi Kojima, Program Head, Kansai Research Center, and Principal Researcher, Climate and Energy, IGES, Japan  
 Akiko Takemoto, Program Head, United Nations University Institute for the Advanced Study of Sustainability (UNU-IAS), Japan  
 Ujjwal Karmakar, Consultant, UNU-IAS, Japan  
 Mahesh Chakrabarti, Consultant, UNU-IAS, Japan  
 Siddharth Gopal, Senior Policy Advisor, International Institute for Sustainable Development, Canada  
 Sanjiv Maheshwari, Professor, Centre for Global Energy Policy, Columbia University, United States  
 Kapil Nanda, Former Economic Affairs Officer, United Nations Economic and Social Commission for Western Asia (UNESCWA), Lebanon  
 Rafia Sebnouh, Chief, Energy Section, UNESCWA, Lebanon

## T20 SOUTH AFRICA 2025

### CONCEPT NOTE

### Task Force 5: Accelerating Climate Action and the Just Energy Transition

**Policy Brief 2025**  
**Equitable CETMs Value Chains:**  
**How can G20 help shape a holistic framework for benefit sharing for the Global South**

# Accelerating climate action

## BREAKTHROUGH AGENDA

- An established annual process launched at COP26
- Owned and led by global south and north countries
- Reinforces & connects successive COP action agenda
- Seven sectors covering over 60% of global emissions
- Involves 150+ major international initiatives

Now backed by  
**61 countries** covering  
over **80% of global  
GDP**

# Sector Breakthroughs - Goals

## BREAKTHROUGH AGENDA

### Power

Clean power is the most affordable and reliable option for all countries to meet their power needs efficiently by 2030.

Co-leads: Morocco and UK  
Launched: COP26  
Signatories: 36  
**Sector Facilitator host:**  
IRENA

### Road Transport

Zero emission vehicles are the new normal and accessible, affordable, and sustainable in all regions by 2030.

Co-leads: India, US and UK  
Launched: COP26  
Signatories: 34  
**Sector Facilitator host:**  
ICCT

### Steel

Near-zero emission steel is the preferred choice in global markets, with efficient use and near-zero emission steel production established and growing in every region by 2030.

Co-leads: Germany and UK  
Launched: COP26  
Signatories: 31  
**Sector Facilitator host:**  
UNIDO

### Hydrogen

Affordable renewable and low carbon hydrogen is globally available by 2030.

Co-leads: India, US, UK  
Launched: COP26  
Signatories: 37  
**Sector Facilitator host:**  
IPHE

### Agriculture

Climate-resilient, sustainable agriculture is the most attractive and widely adopted option for farmers everywhere by 2030.

Co-leads: Egypt and UK  
Launched: COP26  
Signatories: 17  
**Sector Facilitator:** TBC

### Buildings (new at COP28)

Near zero-emission and resilient buildings are the new normal in all regions by 2030.

Co-leads: France and Morocco  
Launch: at COP28  
Signatories: 28 confirmed  
**Sector Facilitator host:**  
Global ABC

### Cement (new at COP28)

Near zero-emission cement is the preferred choice in global markets, with efficient use and near-zero emission cement production established and growing in every region by 2030.

Co-leads: Canada and UAE  
Launch: at COP29  
Signatories: 5 confirmed  
**Sector Facilitator host:** TBC

THE BREAKTHROUGH AGENDA IS  
TACKLING **THE 7 MAJOR SECTORS**  
THAT COVER MORE THAN

**60%** OF GLOBAL  
EMISSIONS.

# Road Transport – PA on Supply Chains

‘Zero emission vehicles the new normal and accessible, affordable and sustainable in all regions by 2030’.

## Results of the 2024 Piloting Exercise

- Improve the sustainability and transparency of **ZEV battery supply chains** globally
- Program to achieve **full value chain transparency**
- **Global reporting framework** to govern rules around measurement, auditing, and reporting of ESG parameters across the battery value chain
- A **digital ID for batteries** containing data about ESG performance, manufacturing history, provenance, battery life extension, recycling
- A **digital platform** to collect, exchange, collate and report data among all authorized lifecycle stakeholders

Number of consortia that participated in the piloting programme	13
Proportion of global cell manufacturing capacity accounted for by piloting companies	80%
Number of piloting consortia that successfully completed the core reporting requirements	10
Number of piloting consortia that engaged in additional trials of data verification	5
Number of cell manufacturers considered “on track” to meet due diligence expectations of EU Batteries Regulation based on piloting results	3
Average number of supply chain companies that participated, per successful consortium	6.1
Total number of supply chain sustainability reports gathered	~200

# Call to Action – A Cooperative Path Forward

- CETMs are a **shared enabler** for climate action, energy transition and prosperity through economic diversification
- **Accelerate international cooperation** and inclusive partnerships
- Arab region has the potential — and responsibility — to **lead by example**

# Accelerating international cooperation on CETMs for advancing the global agenda on climate action

Meeting of the ESCWA Expert Group on Extractive Industries
