

Training Workshop in CRVS evaluation
Amman, 28-30 June 2022
Prof. Michel Guillot

Lecture 6 - Assessing the Completeness of Death Registration
Multiple Census Methods

You are provided with population and death data for South Africa, males.

1. Estimate the distribution of deaths for the intercensal method.
2. Apply the General Growth Balance method to these data, using the provided IUSSP Excel worksheet template and the instructions.
3. Apply the Synthetic Extinct Generation method to these data, using the provided IUSSP Excel worksheet template and the instructions.
4. Discuss the assumptions underlying these two methods.
5. Make an overall assessment of death registration coverage in this population.
