www.educationalgate.com
Educational gate is a pioneer in providing free interactive services to make this opportunity available to all students to in Syria. We are the first website dedicated to this effort in Syria.

Also to build a better committee and support sustainable development.
To become the main virtual reference serve Arab and Syrian Youth community, delivering educational and career attractive and interactive services, to help develop effective youth generations.
Supporting Arab E-Content and integrating them with technological solutions, through web based interactive services.
Problems To Solve

- Student learn in “boring” ways like by memories.
- Not a lot of visual learning more of listening.
- Technology is not involved in the student educational life.
- The percentage of Arabic E content is 0.8% while the English E-content is 55%.
- Low funding's to schools.
- Low-quality Research with Unclear Goals.
Challenges During The Crisis

• Blurry vision of the future.
• Lack of academic staff and experienced professionals.
• Very Limited economic market.
• Blocked E-Services.
• International certificates.
System Of Educational Gate

Innovation in Education

During the Syrian crisis, innovation emerged as for example:

- Volunteering and initiatives
- E-Learning
- Online business

The Crisis didn't limit our youth ambitions, the crisis had an opposite effect in creating horizons which weren't before, it also contributed in a clear increase in the use of modern technology and the internet.

Emerging initiatives like: Link team and IGive.
