## **Economic and Social Commission for Western Asia (ESCWA)**

United Nations Development Account Project on Developing the Capacities of the Arab Countries for Climate Change Adaptation by Applying Integrated Water Resources Management Tools

Workshop on Climate Change Adaptation in the Economic Development Sector Using Integrated Water Resources Management (IWRM) Tools  
Amman, 25-27 May 2016

### **INFORMATION NOTE**

#### **I. BACKGROUND**

The United Nations Development Account Project on Developing the Capacities of the Arab Countries for Climate Change Adaptation by Applying Integrated Water Resources Management Tools project seeks to assist Arab Governments to build their capacity for climate change adaptation by applying integrated water resources management (IWRM) tools. This is sought by: (a) increasing understanding of climate change impacts on water resources and associated vulnerabilities to inform climate change adaptation policy-making; (b) providing a set of regionally appropriate IWRM tools for supporting climate change adaptation in five key sectors (agriculture, economic development, environment, health, and human settlements); and (c) enhancing knowledge of associated best practices in each of the five sectors that may be drawn upon to support the preparation of national and sector based adaptation and development plans. The project is led by the United Nations Economic and Social Commission for Western Asia (ESCWA) in cooperation with the United Nations Environment Program Regional Office for West Asia (UNEP/ROWA), and is implemented in partnership with the Arab Centre for the Studies of Arid Zones and Dry Lands (ACSAD), the Arab Countries Water Utilities Association (ACWUA), Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) and the World Health Organization Centre for Environmental Health Action (WHO/CEHA). This UNDA project builds on the results of the Regional Initiative for the Assessment of the Impact of Climate Change on Water Resources and Socio-Economic Vulnerability in the Arab Region (RICCAR) that is led by ESCWA and implemented by 11 League of Arab States (LAS) and United Nations organizations.

A training manual consisting of five complementary modules, each focused on one of the key sectors was prepared by the respective organizations. This was agreed during the inception meeting of the project that was held on 24 November 2013 in Amman. This workshop aims to present and test the draft module on Economic Development that was prepared by ESCWA. The training module aims to enhance the capacity of Arab Governments to incorporate IWRM tools into economic strategies, policies and plans in order to adapt to climate change. This is done through investigating macroeconomic and microeconomic climate change impacts and applying Integrated Assessment Economic Models (IAMs) that can estimate the economic cost of climate change based on the regional climate projections generated under RICCAR. Adaptation measures and related investment planning tools for supporting economic development and accessing climate finance are also included in the module and will be discussed during the workshop.

#### **II. OBJECTIVE**

The main objectives of the workshop are to:

- Present and discuss the draft module on Economic Development with experts in the sector;

- Test the identified IWRM tools and adaptation measures and their possible incorporation in regional and national policies and plans;
- Present brief case studies from the Arab countries that relate to the subject and discuss possible inclusion in the draft module; and
- Discuss the finalization of the module based on the input and feedback received from the workshop participants.

### **III. PARTICIPANTS**

This workshop will bring together international, regional and national experts in the economic, investment and planning sectors as well as members of the Arab Integrated Water Resources Management Network (AWARENET) and representatives from ESCWA.

### **IV. ORGANIZATION OF THE MEETING**

The workshop will be held at the Kempinski Hotel in Amman, Jordan from 25 to 27 May 2016. The meeting is expected to begin at 9:00 am and conclude by 5:00 pm each day. The registration desk will be open as of 8:30 am on Wednesday, 25 May 2016.

Arabic and English will be the working languages of the meeting. Simultaneous interpretation will be provided. The training materials and documentation for the workshop can be accessed from the meeting link on the following website: <https://www.unescwa.org/events/upcoming>

### **V. LOGISTICAL INFORMATION**

A block of rooms has been reserved for participants at the Kempinski Hotel Amman at the preferential room rate of US\$ 125 for a single room, inclusive of breakfast, internet access and all taxes. A double room may be reserved for US\$145, all inclusive. The hotel is located on Abdul Hamid Shouman Street in the Shmeisani commercial district where one can find restaurants, coffee shops and retail outlets. Kindly indicate on the registration form if you would like ESCWA to reserve a room for you at this hotel.

Airport taxis are easily available curbside outside the airport in Amman for a fixed fee of JD 22 to Shmeisani. Participants may otherwise arrange for airport transfers directly with the hotel.

Invited participants are kindly request to return their completed registration form to ESCWA no later than 20 April 2016 to allow sufficient time to make the necessary arrangements for their travel. Sponsorship cannot be guaranteed for registration forms received beyond that date. Participants are responsible for securing their own visa for travel to Jordan.

### **VI. CORRESPONDENCE**

Correspondence and inquiries concerning the workshop should be addressed to:

Mr. Tarek Sadek  
 First Economic Affairs Officer  
 Water Resources Section
