

Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development

Target 14.c: Enhance the conservation and sustainable use of oceans and their resources by implementing international law as reflected in the United Nations Convention on the Law of the Sea, which provides the legal framework for the conservation and sustainable use of oceans and their resources, as recalled in paragraph 158 of “The future we want”

[Indicator 14.c.1: Number of countries making progress in ratifying, accepting and implementing through legal, policy and institutional frameworks, ocean-related instruments that implement international law, as reflected in the United Nations Convention on the Law of the Sea, for the conservation and sustainable use of the oceans and their resources](#)

Institutional information

Organization(s):

Division for Ocean Affairs and the Law of the Sea, Office of Legal Affairs, United Nations Secretariat

Concepts and definitions

Definition:

Sustainable Development Goal (SDG) indicator 14.c.1 measures the number of countries making progress in ratification of, accession to and implementation of ocean-related instruments that implement international law, as reflected in the United Nation Convention on the Law of the Sea (UNCLOS), for the conservation and sustainable use of the oceans and their resources.

There are two aspects to this indicator:

- the number of countries making progress in ratifying and acceding to ocean-related instruments that implement international law as reflected in UNCLOS for the conservation and sustainable use of the oceans and their resources, and
- the number of countries making progress in implementing such instruments through legal, policy and institutional frameworks.

Rationale:

Target 14.c seeks to enhance the conservation and sustainable use of oceans and their resources by implementing international law as reflected in UNCLOS.

UNCLOS sets out the legal framework within which all activities in the oceans and seas must be carried out, including the conservation and sustainable use of oceans and their resources. It is a framework instrument, which provides for the development of other instruments that conform to the provisions of the Convention. Therefore, progress in the implementation of international law as reflected in UNCLOS can only be comprehensively measured if progress in the implementation of ocean-related instruments that in turn implement international law as reflected in UNCLOS, is also measured.

Such instruments include, in particular, UNCLOS's two implementing agreements - the Agreement relating to the implementation of Part XI of the United Nations Convention on the Law of the Sea of 10 December 1982 (Part XI Agreement) and the Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks (UNFSA).

Accordingly, following extensive consultation with Member States and other stakeholders, the methodology for indicator 14.c.1 measures the number of countries making progress in ratifying, acceding to and implementing UNCLOS, the Part XI Agreement and UNFSA through legal, policy and institutional frameworks.

Data collected through the first administration of the questionnaire, which is based on the indicator, will provide a baseline of the current state of ratification of, accession to and implementation of UNCLOS and its two implementing agreements. Subsequent indicator-based data will then show progress made by countries.

Countries that do not respond to the questionnaire, or do not approve the use of their responses to the questionnaire, will not receive indicator scores.

Concepts:

N/A.

Comments and limitations:

Implementation of UNCLOS and its implementing agreements through legal frameworks (for example, through national legislation or executive acts) as well as policy and institutional frameworks will be scored on the basis of a self-analysis by countries of the extent of implementation. Countries will be invited in the questionnaire to share information regarding their methods of implementation.

Methodology

Computation Method:

The indicator measures the number of countries making progress in ratifying, accepting and implementing UNCLOS and its two implementing agreements through legal, policy and institutional frameworks.

This measurement of progress is computed on the basis of countries' responses to the questionnaire, which contains three questions in respect to each of the three instruments.

Countries will be invited to respond to questions which relate to ratification of or accession to UNCLOS and its two implementing agreements (Questions 1.1, 2.1 and 3.1). They are coded with simple "Yes/No" answers, with a score of "1" for "Yes" and "0" for "No". Each country's overall score for ratification or acceptance of these instruments will therefore be a number between 0 and 3, which will be reported as a percentage (with "100" representing a score of "3", and "0" representing a score of "0").

Countries will also be invited to respond to questions which relate to implementation of UNCLOS and its two implementing agreements through legal frameworks (Questions 1.2, 2.2 and 3.2) by evaluating their

own national implementation and assigning a score of between 1 and 9 – with “1” being “not at all” and “9” being “fully” – or indicating that the question of implementation is not applicable (“N/A”).

Countries will further be invited to indicate whether they have a national policy and/or a national institution or another mechanism, such as a national focal point or an inter-agency or inter-departmental working group, with responsibility for ensuring that the problems of ocean space (UNCLOS), matters related to the deep seabed (Part XI Agreement) and matters related to [sustainable] fisheries (UNFSA) are considered through an integrated, interdisciplinary and inter-sectoral approach (Questions 1.3, 2.3 and 3.3). These questions are coded with simple “Yes”, “No” and “N/A” answers, with a score of “1” for “Yes” and “0” for “No”.

The scoring methodology regarding implementation is the total of the scores reported by States regarding implementation through legal frameworks for UNCLOS and each of its two implementing agreements (in response to Questions 1.2, 2.2 and 3.2), added to the relevant scores achieved regarding implementation through national policy and/or national institutions for UNCLOS and each of its implementing agreements (in respect to Questions 1.3, 2.3 and 3.3). Pursuant to this scoring methodology, each State could achieve a maximum score of 30 points for implementation.

These scores which will be reported as a percentage (with 100 representing an average score of 30, 80 representing an average score of 24, and so on). “N/A” responses will not be included as part of the overall score calculation.

Disaggregation:

Data will be disaggregated into two scores per country – one score for ratification of or accession to relevant instruments, and one score for implementation of relevant instruments. These scores could then be aggregated regionally or globally.

Treatment of missing values:

- [At country level](#)

Not imputed.

- [At regional and global levels](#)

Not imputed. Data will only be aggregated from responding countries.

Regional aggregates:

Regional and global data regarding ratification of, accession to and implementation of UNCLOS and its implementing agreements would be aggregated by calculating the unweighted average of the scores of each country in that region (or globally) with respect to ratification/accession and with respect to implementation.

Sources of discrepancies:

N/A.

Methods and guidance available to countries for the compilation of the data at the national level:

A questionnaire, with accompanying instructions regarding its completion is used to collect national-level data.

Quality assurance

Data on ratification of and accession to UNCLOS and its two implementing agreements is available, and may be verified, through the Secretary-General, as depositary for those instruments.

UNCLOS and UNFSA do not provide for a secretariat. OLA/DOALOS performs the role of secretariat for these instruments *de facto* but has received no mandate from the General Assembly to review or assess the status of implementation of these instruments.

Respondent countries will be invited to share relevant information regarding the implementation of UNCLOS and its implementing agreements in their responses to the questionnaire.

Data Sources

Description:

Data will be collected through a questionnaire, which has been developed to facilitate measurement of the number of countries making progress in ratifying, accepting and implementing through legal, policy and institutional frameworks, ocean-related instruments that implement international law, as reflected in UNCLOS, for the conservation and sustainable use of the oceans and their resources, as called for under indicator 14.c.1.

Collection process:

OLA/DOALOS will coordinate distribution/completion of the 14.c.1 questionnaire through the Permanent Missions to the United Nations in New York. The Permanent Missions would coordinate distribution of the questionnaire amongst relevant government ministries, departments and agencies, and submit the completed questionnaires to OLA/DOALOS, as necessary.

Data Availability

Description:

Indicator 14.c.1 is a new indicator. The initial administration of the indicator 14.c.1 questionnaire will establish baseline data for this indicator. The only information that is currently publicly available is the number of parties to UNCLOS and its implementing agreements, since those treaties are deposited with the Secretary-General of the United Nations.

Time series:

N/A.

Calendar

Data collection:

Baseline data collection is planned for 2020. Data collection will be repeated every two to three years.

Data release:

2020.

Data providers

Data will be provided by relevant government ministries, departments and agencies.

Data compilers

OLA/DOALOS.
