Chapter II presents the main consolidated national accounts for each ESCWA member country. All the tables presented are based on data provided by the national statistical offices of corresponding countries up to November 2011. In those cases where no national data were available, particularly in the case of the last year in a series, various statistical methods were used to calculate estimates of the main aggregates. Figuring for those countries which did not provide 2010 estimates, implicit deflators were estimated through regression of historical time-series against Consumer Price Index (CPI) estimates and, along with real growth forecasts, were employed to obtain estimates of GDP aggregates, in both constant and current terms.

General observations on the national data presented in this chapter are set forth below.

**Bahrain**

The national accounts section of the Economic Planning Directorate in the Ministry of Finance and National Economy prepared these tables in accordance with the United Nations System of National Accounts (SNA) 1968.

**Egypt**

The Ministry of Planning prepared the national accounts tables in accordance with the classifications and definitions of SNA 1993.

**Iraq**

The data for Iraq were provided by the national accounts unit at the Central Bureau of Statistics. Data were prepared in accordance with SNA 1993.
Jordan

The National Accounts Division in the Department of Statistics prepared the national accounts tables in accordance with SNA 1993.
