الفصل الثاني
Chapter II

الحسابات الموحدة للبلدان بالعملات الوطنية بالأسعار الجارية
Consolidated national accounts in national currencies
at current prices
Chapter II presents the main consolidated national accounts for each ESCWA member country. All the tables presented are based on data provided by the national statistical offices of corresponding countries up to November 2013. In cases where no national data were available, particularly for the last year in a series, various statistical methods were used to calculate estimates of the main aggregates. For countries which did not provide 2012 estimates, implicit deflators were estimated through regression of historical time-series against Consumer Price Index (CPI) estimates and, along real growth forecasts, were employed to obtain estimates of GDP aggregates, in both constant and current terms.

Figures are presented at the end of each set of country tables to outline the economic structure of the country in question, with GDP classified according to economic activity and expenditure.

General observations on the national data presented in this chapter are set forth below.

**Jordan**

The national accounts division in the Department of Statistics prepared the national accounts tables in accordance with SNA 1968.

**The United Arab Emirates**

The National Bureau of Statistics prepared the national accounts data in accordance with SNA 1968.
